

Undersea Centre Ltd

SERVING THE DIVING INDUSTRY SINCE 1974

Info@undersea-centre.com www.undersea-centre.com 023 8235 8111

1232 MANIFOLD BAR X 420MM

All 8 threads are 1/4 BSPP (G1/4). If you use our fittings you will only need a 10x2mm "O" Ring to seal into this manifold.

Corner threads are M6.

If you prefer, you may drill out with a 6mm drill so that you may use a screw to fix manifold to a wall.

If you wish to bring charging hoses out at 90° to bar, use our 3084 swivel elbow. Screw the shaft into the manifold, then fit a 1265 adapter into swivel to take our charging hoses.

Maximum W.P. 330 BAR (with Brass fittings) or 414 BAR (with stainless steel fittings).

If you need more information please contact us
